Basic Information

- Place of Origin: Japan
- Brand Name: Panasonic
- Model Number: CM602-L,NM-EJM8A
- Minimum Order Quantity: 1/pcs
- Price: USD+negotiable+pcs
- Packaging Details: 2600*2500*1800mm
- Delivery Time: 1-7 days
- Payment Terms: T/T
- Supply Ability: 1+pcs+ per days

Product Specification

- Model Name: CM602-L
- Model: NM-EJM8A
- Substrate Size: L 50 Mm x W 50 Mm L 510 Mm x W 460 Mm
- High-speed Placement Head: 12 Nozzles
- Placement Speed: 20 000 Cph (0.18 S / QFP)
- Mounting Accuracy: $\pm 35 \mu\text{m}$ / QFP (Cpk ≥ 1)
- Component Size: 0603 Chip ~ L 100 Mm x W 90 Mm x T 25 Mm * 7
- Universal Mounting Head: LS 8 Nozzles
- Universalized Ver.5 Option: 0402 Chip * 5 L 100 Mm x W 50 Mm x T 15 Mm * 6
- Multi-function Placement: 3 Nozzles
- Power Supply: Three-phase AC 200, 220, 380, 400, 420, 480 V, 4.0 KVA

Product Description

Panasonic CM602-L NM-EJM8A High-Speed Placement Machine

The Panasonic CM602-L NM-EJM8A is a cutting-edge high-speed placement machine designed for efficiency and precision in the electronics manufacturing industry. Known for its reliability and versatility, this model excels in handling a wide range of components, making it ideal for high-mix production environments.

Key Features

- High-Speed Operation:** With its advanced motion control technology, the CM602-L achieves remarkable placement speeds, significantly boosting productivity.
- Flexible Configuration:** The machine supports various component sizes and types, from small chips to large ICs, accommodating diverse production needs.
- Dual Conveyor System:** This feature allows simultaneous handling of multiple PCBs, reducing downtime and improving throughput.
- Precision and Accuracy:** Equipped with Panasonic's state-of-the-art vision system, it ensures precise alignment and placement of components.

Benefits

- Increased Efficiency:** The combination of speed and precision leads to reduced cycle times and higher output.
- Adaptability:** Easily adapts to changes in production requirements, making it suitable for different product lines.
- Reliability:** Built with robust components, it ensures consistent performance in demanding manufacturing environments. The Panasonic CM602-L NM-EJM8A is a powerful solution for manufacturers looking to enhance their SMT assembly capabilities, focusing on speed, flexibility, and reliability.
