

PCB Surface Cleaning Machine JYC-350CLA

Our Product Introduction

for more products please visit us on smtmachinepart.com

Basic Information

- Place of Origin: China
- Brand Name: GS
- Model Number: JYC-350CLA
- Minimum Order Quantity: 1 PCS
- Price: USD+negotiable+pcs
- Packaging Details: 700*900*1600mm
- Delivery Time: 1-7 days
- Payment Terms: T/T
- Supply Ability: 1+pcs+per days

Product Specification

- Model: JYC-350CLA
- Overall Size: 600*800*1500mm
- Suitable For PCB Board Size: 50*50-550*350mm (size Is Not Limited, Other Sizes According To Customer Requirements)
- Condition: Original New
- Highlight: **pcb smt pick and place machines, pcb smt pick and place equipment**

Product Description

PCB Surface Cleaning Machine

一, Use:

Located on the SMT production line, it is used between the loading machine and the printing press to remove static electricity on the PCB board and clean the PCB surface chip, dust, hair, glass fiber, etc., before printing solder paste or dispensing, so as to reduce the defect rate of air welding and virtual welding after the furnace and improve product quality.

二, Working principle:

When the substrate passes through the machine track, the adhesive roller rolls and contacts the substrate surface, using the stickiness of the adhesive roller to adhere to foreign objects such as dust, board scraps, green oil residue, hair, etc. on the substrate surface. At the same time, the adhesive roller contacts the adhesive roller and adsorbs the foreign objects on the adhesive roller.
