Multi Functional Auxiliary Material Shielding Cover Attachment Machine JYCT-4000

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: GS
- Model Number: JYCT-4000
- Minimum Order Quantity: 1 PCS
- Price: USD+negotiable+pcs
- Packaging Details: 1100*1400*1600mm
- Delivery Time: 1-7 days
- Payment Terms: T/T
- Supply Ability: 1+pcs+per days
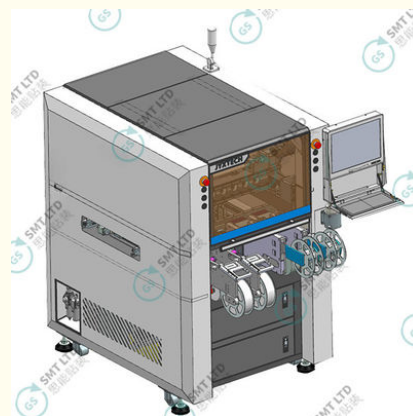

Product Specification

- Equipment Model: JYCT-4000
- Equipment Size: 1000(L)*1300(W)*1500(H)mm
- PCB Size: Min.50mm X 50mm Max.400 Mm X450 Mm
- PCB Transmission: L→R,L→L,R→L,R→R
- Label Size: Min.3*3mm Max.30*50mm
- Placing Speed: 0.8-1.5sec/pcs
- Placing Accuracy: ±0.05mm
- Label Stripping Method: Intelligent Feeder Divider
- Material Rack Placement: 4PCS
- Label Output Specification: 1-15PCS/row
- Width Adjustment: Adjustable Track Rear Movement
- Equipment Interface: SEMI Input/output 4-core International Standard Interface
- Highlight: **Multi Functional Shielding Cover Attachment Machine**
  , **Auxiliary Shielding Cover Attachment Machine**

Product Description

Multi-functional auxiliary material shielding cover attachment machine JYCT-4000

一,About:

The equipment is a multifunctional auxiliary material shielding cover installation machine, based on Windows operating system, self-developed operating software, simple and easy to understand interface, intelligent operation mode; X, Y axis adopts gantry structure more expansibility, workbench and gantry are made of marble material, better accuracy and stability; The feeder is easy to switch, with a variety of feeding methods such as push forward and pull back, to solve the feeding problems of various materials; The main moving parts of the whole machine are imported parts to ensure stability.

二,Purpose:

For SMT production line for SMT production line PCB (printed circuit board) sticker QR code label, adhesive paper, pot piece, thermal silicone, shielding cover, etc.

三,Scope of application:

1.PCB board sticker: two-dimensional code, adhesive paper, pot piece, thermal silicone, shielding cover, etc

2.FPC adhesive: pressure sensitive adhesive, PI, conductive adhesive, foam, two-dimensional code, pot piece, double-sided adhesive, etc

3.Display module sticker: heat dissipation graphite sheet, conductive adhesive, two-dimensional code, double-sided adhesive

4.Camera module: foam, conductive adhesive, high-temperature adhesive, double-sided adhesive, two-dimensional code, etc

5.Fingerprint module: foam, conductive adhesive, high temperature adhesive, PI, double-sided adhesive, etc

6.TWS Bluetooth module: Myra, QR code, air filter, etc

7.Wireless charging module: double-sided tape, high-temperature glue, two-dimensional code, etc

四,Application Industry:

Mobile phone industry, TWS industry, TP industry, laptop industry, radio charging industry, FPC industry

Multi-functional auxiliary material shielding cover attachment machine JYCT-4000 | GSSMT, Multi-functional attachment machine, Auxiliary material handling equipment, Shielding cover application machine, Automated attachment systems, EMI shielding cover machine, Integrated attachment solutions, Multi-purpose assembly machine, Shielding cover installation equipment, Auxiliary machinery for manufacturing, Flexible cover attachment systems, Advanced shielding technologies, Multi-functional industrial machines, Attachment machine for electronics, Robotic cover application systems, Precision shielding cover machinery, Auxiliary equipment for assembly lines, High-speed attachment machines, Custom shielding solutions machinery, Versatile material attachment systems, Industrial shielding and attachment solutions
