

Sony SI-G200 High-speed Multifunction SMT Pick And Place Machine for Precision Component Placement

Our Product Introduction

for more products please visit us on smtmachinepart.com

Basic Information

- Place of Origin: Japan
- Brand Name: SONY
- Model Number: SI-G200
- Minimum Order Quantity: 1 PCS
- Price: USD+negotiable+pcs
- Packaging Details: 150*180*185cm
- Delivery Time: 1-7 days
- Payment Terms: T/T
- Supply Ability: 1+PCS+per days

Product Specification

- Model: SI-G200
- SI-G200 High-speed Head: Multifunction Head
- Condition: Original New/Used Original
- Lead Time: 1-7 Days
- Highlight: Multifunction Pick And Place Machine, SI-G200 Pick And Place Machine, smt pick and place machine for sale

Product Description

Original SI-G200 Speed Multifunction SMT Pick And Place Machine For Precise Component Placement

Elevate your SMT line's efficiency with the Sony SI-G200, a high-speed chip mounter engineered for precision and performance. This advanced pick and place machine streamlines PCB assembly with its rapid component placement, robust feeder system, and intelligent software integration.

Designed to handle diverse PCB sizes and complex SMT components, the SI-G200 ensures superior placement accuracy for high-volume production. Experience unparalleled reliability with Sony's leading surface mount technology, making the SI-G200 an essential asset for any electronics manufacturer aiming to boost productivity and quality in their assembly process.

Trust in the Sony SI-G200 for a future-proof investment in your SMT capabilities.

Key Features

- High-speed chip mounter with precision component placement
- Robust feeder system for reliable operation
- Intelligent software integration for streamlined workflow
- Handles diverse PCB sizes and complex SMT components
- Superior placement accuracy for high-volume production
- Sony's leading surface mount technology
- Future-proof investment in SMT capabilities
