

SJ INNO TECH HP-520S Screen Printer with 2D SPI and Advanced Vision System Featuring Programmable Squeegee Pressure

Our Product Introduction

for more products please visit us on smtmachinepart.com

Basic Information

- Place of Origin: KOREA
- Brand Name: SJ INNO TECH
- Model Number: HP-520S
- Minimum Order Quantity: 1 PCS
- Price: USD+negotiable+pcs
- Packaging Details: 1600*1700*1650
- Delivery Time: 1-7 days
- Payment Terms: T/T
- Supply Ability: 1+pcs+per days

Product Specification

- MODEL: HP-520S
- DEMENSION: 1530Lx1635Wx1550H
- SERIAL NO.: HP-520S-18006-2106
- WEIGHT: 1360 Kg
- DATE: 2018.5
- Rated Voltage: 1P 220Vac
- Rated Frequency: 50/60Hz
- Rate Current: 3.9A
- Air Pressure: 0.5±0.1Mpa, 40NL/min
- Max. Current: 32A
- Highlight: 2D SPI Screen Printer, Advanced Vision System Solder Paste Printer, Programmable Squeegee Pressure SMT Printer

Product Description

SJ INNO TECH HP-520S - Screen Printer with 2D SPI

Advanced Solder Paste Printer with integrated 2D Solder Paste Inspection system for comprehensive PCB assembly quality control.

Key Features

- 2D Solder Paste Inspection (SPI) system
- 3-stage automatic conveyor system
- Automatic under stencil cleaning
- Complete process control capabilities
- Programmable squeegee pressure (5 front, 5 back settings)

Advanced Vision System

The standard advanced vision system inspects all shaped fiducials and incorporates multi-color lighting technology suitable for all PCB types and colors. This integrated system includes 2D Solder Paste Inspection for built-in quality assurance throughout the printing process.

PCB Clamping Technology

Unique PCB Top Link Edge Clamping System ensures a completely smooth surface between the PCB and stencil, providing superior printing accuracy and consistency.

Cleaning System

Comprehensive cleaning system features blow function, dual vacuum ports, cleaning dispense mechanism, and programmable paper advance during cleaning cycles for optimal stencil maintenance.

Application: Designed for automated screen printing applications across all PCB types with integrated quality inspection capabilities.
