

PARMI SPI HS60XXL SOLDER PASTE INSPECTOR

Our Product Introduction

for more products please visit us on smtmachinepart.com

Basic Information

- Place of Origin: Korea
- Brand Name: PARMi
- Model Number: HS60XXL
- Minimum Order Quantity: 1 PCS
- Price: USD+negotiable+pcs
- Packaging Details: 1550*1600*1650mm
- Delivery Time: 1-7 days
- Payment Terms: T/T
- Supply Ability: 1+pcs+per days

Product Specification

- Machine Name: SOLDER PASTE INSPECTOR
- Model: HS60XXL
- Maker: Parmi / Korea
- Input Power: AC 220V, 1Phase, 60/50Hz, 16A
- Air Pressure: 0.5±0.1MPa
- Weight: 1000kg
- Dimension: 1450(D)x1500(W)x1550(H)
- Serial No: H6LT66616F2XLP
- Manuf.Date: Jul.2016
- Condition: Used Original

Key Features of PARMi SPI HS60 and Related Models

1. Advanced Inspection Technology:

3D Laser Triangulation Sensor: Provides robust 3D data and profiles the real shape of features, offering high accuracy against variations in materials and surface conditions.

Dual Laser Projection: Eliminates shadow effects, allowing for precise measurement of components, even those with significant height differences.

2. Real-Time Warpage Tracking:

Accurately measures PCB warpage up to $\pm 5\text{mm}$ using real-time Z-axis control and scanning.

3. Component Inspection:

Can inspect components up to 65mm in height using a multi-step scanning method, providing industry-leading height measurement capabilities.

4. User Interface and Control:

Features a user-friendly interface with graphical windows for easy operation and setup.

Supports remote management of multiple SPI systems, reducing manpower needs while maintaining consistent quality.

5. Inspection Speed and Resolution:

Models like the HS60 Supreme offer inspection speeds of $100\text{cm}^2/\text{sec}$ at resolutions of $13 \times 13\mu\text{m}$. However, specific speeds for the HS60XXL are not detailed.

6. Material Compatibility:

PARMi's inspection technology is compatible with various materials and surface conditions, unaffected by color or material variations.
