

GSM11 Series Silver Splice Anti-static SMT Cover Tape Extender for SMT Process

Our Product Introduction

for more products please visit us on smtmachinepart.com

Basic Information

- Place of Origin: China
- Brand Name: GS
- Model Number: GSM1108/GSM1112/GSM1116/GSM1124
- Minimum Order Quantity: 1 PCS
- Price: USD+negotiable+pcs
- Packaging Details: 46*8*3mm
- Delivery Time: 1-7 days
- Payment Terms: T/T
- Supply Ability: 1+pcs+per days

Product Specification

- Brand Name: GS
- Material: PET
- Model Number: GSM1108/GSM1112/GSM1116/GSM1124
- Product Name: SMT Cover Tape Extenders
- Application: SMT Process
- Customization: Support
- Highlight: pet smt splice tape, pet smt double splice tape

Product Description

SMT Silver Splice Anti-static Cover Tape Extender GSM11 Series

The GSM11 Series SMT Cover Tape Extenders are engineered to extend cover tape when minimal or no leader is available. This innovative solution prevents component waste and significantly reduces feeder load time. Featuring pre-cut strips that adhere quickly, these extenders accommodate reels of all sizes and are particularly effective for partially cut reels.

Instructions for Use

Remove Release Liner: Begin by removing the release liner to expose the adhesive side of the extender, preparing it for attachment to the cover tape.

Align with Carrier Tape: Carefully align the adhesive side of the extender with the front edge of the carrier tape. Proper alignment ensures secure attachment and optimal cover tape extension.

Apply Adhesive Strip: Firmly press the complete adhesive strip onto the component cover tape. This creates a durable, secure bond that withstands the feeding process.

Feed into Feeder: Guide the non-adhesive side of the extender into the feeder, completing the cover tape extension and preparing the reel for SMT assembly operations.
