

Dust Free SMT Wiper Roll For MINAMI Machine Reusable GSM602 Series

Our Product Introduction

for more products please visit us on smtmachinepart.com

Basic Information

- Place of Origin: China
- Brand Name: GS
- Model Number: GSM602 series
- Minimum Order Quantity: 1 roll
- Price: USD+negotiable+roll
- Packaging Details: 550*10*10mm
- Delivery Time: 1-7 days
- Payment Terms: T/T
- Supply Ability: 1+roll+per days

Product Specification

- Brand Name: GS
- Model Number: GSM602 Series
- Product Name: SMT Stencil Clean Rolls
- Material: Wood Pulp+Polyester
- Application: SMT Process
- Customization: Support
- Highlight: **Dust Free SMT Wiper Roll, SMT Wiper Roll GSM602**

Product Description

Dust Free SMT Wiper Roll For MINAMI Machine Reusable

Application and Usage

SMT Assembly Lines:

In SMT assembly lines, the cleanliness of stencils is paramount to achieving high-quality solder paste applications. These stencil clean rolls are used to regularly clean the stencils, ensuring that any residual paste or glue is removed before the next print cycle. This regular cleaning helps maintain the accuracy and quality of the solder paste deposits, reducing the risk of defects and rework.

PCB Manufacturing:

In PCB manufacturing, maintaining clean stencils and PCBs is essential for achieving reliable and high-quality electronic assemblies. These clean rolls are used to remove any residual contaminants from the stencils and PCBs, ensuring that the solder paste and red glue are applied accurately and consistently. This helps to prevent issues such as solder bridging, insufficient solder, and other common defects.

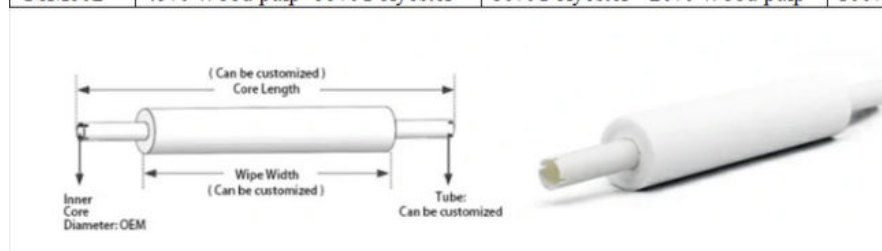

Cleanroom Environments:

For manufacturing environments that require stringent cleanliness standards, such as cleanrooms, these SMT stencil clean rolls are an ideal choice. Their lint-free and non-allergic properties make them suitable for use in cleanrooms, ensuring that the high standards of cleanliness are maintained throughout the manufacturing process.

Customized Solutions:

Given the variety of material options and tube types available, these clean rolls can be customized to meet specific requirements. Manufacturers can choose the material and tube type that best suits their cleaning needs, ensuring optimal performance and compatibility with their equipment. This customization capability makes these clean rolls a versatile and flexible solution for a wide range of applications.

Part	Plain grain	Grid	PP
GSM602	45% Wood pulp+55% Polyester	80% Polyester+ 20% Wood pulp	100% PP
