

Customized SMT Splice Pliers Tools With Adjustable C Bracket GSMTL00

Our Product Introduction

for more products please visit us on smtmachinepart.com

Basic Information

- Place of Origin: China
- Brand Name: GS
- Model Number: GSMTL00
- Minimum Order Quantity: 1 PCS
- Price: USD+negotiable+pcs
- Packaging Details: 25cmx 10cm x 10cm
- Delivery Time: 1-7 days
- Payment Terms: T/T
- Supply Ability: 1+pcs+per days

Product Specification

- Brand Name: GS
- Model Number: GSMTL00
- Product Name: SMT Splice Pliers Tools
- Dimensions (pc): 21cmx 7cm X 7cm
- Material: Steel Tool Body+Plastic Handle
- Application: SMT Process
- Customization: Support
- Weight: 0.5kg
- Highlight: **SMT Splice Pliers Tools, Customized Splice Pliers Tools**

Product Description

GSMTL00 SMT Splice Pliers Tools With Adjustable C Bracket

Product Description

The GSMTL00 Splice Pliers is a cutting-edge, ergonomically designed handheld tool, engineered to seamlessly join carrier tape reels of all widths. Crafted with precision, this tool ensures reliable and secure splicing, making it an indispensable asset for your Surface Mount Technology (SMT) assembly processes. The GSMTL00 is fully compatible with the GSM0600 splice clips, providing a versatile solution for your splicing needs.

Applications

1. SMT Carrier Tapes: Specifically designed to splice SMT carrier tapes of any size.
2. Versatile Splicing: Ideal for use with GSM0600 splice clips and splice tapes of varying sizes.
3. Secure Connections: Ensures carrier tapes of all widths are joined securely, enhancing the integrity of your assemblies.

Advantages

1. Precision Alignment: 5mm placement pin guides guarantee perfect alignment for every splice.
2. Firm Clamping: Securely holds carrier tapes, preventing movement and ensuring a consistent splice.
3. Efficient Crimping: Ratchet style crimping mechanism provides uniform pressure for a reliable connection.
4. User-Friendly Design: Ergonomically designed handle reduces hand strain, allowing for prolonged use without discomfort.

Instructions for Use

1. Prepare the Tool: Crimp the tool handle to open the front panel jaws.
2. Position the Splice Clip: Place a splice clip (teeth up) on the placement pins.
3. Align the Carrier Tapes: Center both carrier tapes (cover tape up) on the pins and secure them with the clamps.
4. Crimp to Connect: Crimp the handle to connect the carrier tapes securely.
5. Complete the Splice: Add a splice tape strip to the cover tape and press firmly to finalize the splice.
