

YAMAAH SMT Machine YSM10 YS24 Smt Feeder Rack Electric Feeder Car Feeder Storage Car Placement Car

Our Product Introduction

for more products please visit us on smtmachinepart.com

Basic Information

- Place of Origin: China
- Brand Name: YAMAHA
- Model Number: YSM10 / YSM20R / YS24
- Minimum Order Quantity: 1 PCS
- Price: USD+negotiable+pcs
- Packaging Details: L1100*W700*H1270mm(±30mm)
- Delivery Time: 1-7 days
- Payment Terms: T/T
- Supply Ability: 1+pcs+per days

Product Specification

- Brand Name: YAMAHA
- Product Name: Feeder Car
- Model Number 1: YSM10 Feeder Car
- Model Number 2: YSM20R Feeder Car
- Model Number 3: YS24 Feeder Car
- Condition: Original New/Used Original
- Highlight: Electric SMT Feeder Rack,
YS24 Smt Feeder Rack,
YAMAAH YSM10 SMT Feeder Rack

Product Description

Feature description

Feeder series: CL8*2MM, CL8*4MM, CL12MM, CL16MM,CL24MM,CL32MM,CL44MM,CL56MM complete specifications

Instructions for use

The working principle of Feeder mainly involves the identification and positioning of components, component picking and mounting process. Although different types of feeders are different in structure, their working principle is basically the same. Here are the steps:

1. Component identification and positioning: The feeder Fida recognizes the type, size and pin direction of the component through the internal sensor or camera, and transmits this information to the control system of the chip mounter. The control system calculates the precise position of the component according to this information, and directs the sticker head to pick up.
2. Component pickup: The chip head is moved to the designated position of the feeder according to the instructions of the control system, and the components are picked up by vacuum adsorption or mechanical clamping. For example, in the Yamaha chip mounter Feida, the robotic arm picks up components through a vacuum nozzle, with different sizes of components using different sizes of mouthpieces to ensure accurate pickup.
3. Mounting process: After picking up the components, the mounting head places the components precisely on the specified position of the PCB board. This process requires a high degree of precision and speed to ensure the quality and efficiency of the patch.

Application/field of application

The types of chip feeder include but are not limited to belt feeder, disc feeder, tube feeder and bulk feeder. Each type of feeder is suitable for electronic components with different package types, sizes and mounting requirements. For example, the belt feeder is suitable for braided packaged components, such as resistors, capacitors, etc.; Disk feeder is mainly used for feeding chip components; Tubular feeder is suitable for specially packaged components; Bulk feeders are used for components of irregular shape or large size.

YAMAHA SS electric 8mm feeder,KHJ-MC100-000

YAMAHA SS Electric 12/16mm feeder,KHJ-MC200-000

YAMAHA SS electric 24mm feeder,KHJ-MC400-000

YAMAHA SS electric 32mm feeder,KHJ-MC500-000

YAMAHA SS electric 44mm feeder,KHJ-MC600-000

YAMAHA SS electric 56mm feeder,KHJ-MC700-000

YAMAHA SS electric 72mm feeder,KHJ-MC800-000

Yamaha ZS 4mm feeder KLJ-MCN00-000

Yamaha ZS 8mm feeder,KLJ-MC100-000

Yamaha ZS 12/16mm feeder,KLJ-MC200-000

Yamaha ZS 24mm feeder KLJ-MC400-000

Yamaha ZS 32mm feeder,KLJ-MC500-000

Yamaha ZS 44mm feeder KLJ-MC600-000

Yamaha ZS 56mm feeder KLJ-MC700-000

Yamaha ZS 72mm feeder,KLJ-MC800-000

Yamaha ZS 88mm feeder KLJ-MC900-000

Yamaha ZS 4mm feeder KLJ-MCN00-000
