

Panasonic SMT Feeder Calibration Jig NM-EJW2A with $\leq 0.02\text{mm}$ Adjusted Accuracy for CM402/CM602/NPM Feeders and Includes Jig Tape Set

Our Product Introduction

for more products please visit us on smtmachinepart.com

Basic Information

- Place of Origin: Japan
- Brand Name: Panasonic
- Model Number: NM-EJW2A
- Minimum Order Quantity: 1 PCS
- Price: USD+negotiable+PCS
- Packaging Details: 400*500*1100mm
- Delivery Time: 1-7 days
- Payment Terms: T/T
- Supply Ability: 1+PCS+per days

Product Specification

- Model Number: NM-EJW2A
- Application: Calibrate Adjust CM402,CM602,NPM Feeder
- Dimension: 400*500*1100mm
- Power: 100-240V 50/60Hz
- Adjusted Accuracy: $\leq 0.02\text{mm}$
- Calibrated Accuracy: $\leq 0.05\text{mm}$
- Jig Tape Set: 1 set(8mm,12mm,16mm,24mm,32mm, master Jig)
- Weight: 60kg
- Highlight: **Panasonic Feeder Calibration Jig, NPM Feeder Calibration Jig**

Product Description

SMT NPM Panasonic Feeder Calibration Jig CN604/402/NPM NM-EJW2A

Overview

The Panasonic SMT Feeder Calibration Jig NM-EJW2A is engineered to ensure precise calibration of SMT feeders for optimal performance in electronics manufacturing environments.

Usage Process

- Setup:** Securely position the feeder onto the calibration jig
- Calibration Process:** Use the jig to adjust feeder alignment and tension settings
- Verification:** The jig confirms accurate component delivery to the pick-up point
- Adjustment:** Make necessary corrections for any misalignments or feeding issues

Primary Functions

- Accuracy:** Ensures precise feeder calibration for accurate component placement on PCBs
- Efficiency:** Reduces downtime with quick and easy feeder calibration
- Quality Control:** Maintains consistent production quality by keeping feeders within specified tolerances
- Longevity:** Extends feeder lifespan by preventing excessive wear through regular calibration

Operational Benefits

- Enhanced Productivity:** Minimizes errors for smoother production runs and reduced rework
- Cost Savings:** Lowers production costs by reducing component misplacement and machine stoppages
- Consistency:** Ensures uniform component placement essential for high-volume manufacturing

The NM-EJW2A calibration jig is an essential tool for maintaining precision and efficiency in SMT production lines. By ensuring proper feeder calibration, it supports consistent quality and optimal performance in electronics manufacturing.

For detailed technical specifications, please refer to the manufacturer's documentation.
