Product Description

ASM / Siemens X Series SMT Feeder Calibration Jig Adjustable

Siemens X Series Feeder Calibration Jig

Calibration of Feeders: Used to calibrate the position and function of feeders on SMT machines, ensuring accurate component pickup and placement.

Verification of Eject Pin Position: Helps verify the position and function of the eject pin, which is crucial for proper component handling.

Simulation of Machine Operation: Many calibration jigs can simulate SMT machine operation, allowing for adjustments under production-like conditions.

High Magnification Inspection: Often equipped with high magnification cameras (e.g., CCD), enabling detailed inspection of feeder components and precise adjustments.

Adjustment and Verification Tools: Typically include tools like master gauges or calibration rulers to ensure precise adjustments and verification of feeder settings.
