

Original Used FUJI NXT H02F HEAD UH02633 for SMT Production Line

Our Product Introduction

Basic Information

- Place of Origin: Japan
- Brand Name: FUJI
- Model Number: UH02633
- Minimum Order Quantity: 1 PCS
- Price: USD+negotiable+pcs
- Packaging Details: 600*350*360mm
- Delivery Time: 1-7 days
- Payment Terms: T/T
- Supply Ability: 1+pcs+per days

Product Specification

- Brand Name: FUJI
- Product Name: NXT H02F Head
- Model Number: UH02633
- Condition: Original New/Used Original
- Highlight: **Original Used FUJI NXT H02F HEAD, UH02633 FUJI NXT H02F HEAD**

Product Description

FUJI H02F HEAD: High-Speed, High-Accuracy Placement for Enhanced SMT Production

The FUJI H02F HEAD is a high-performance placement solution designed for FUJI's NXT series of SMT (Surface Mount Technology) placement machines. This dual-nozzle head is engineered for high-speed and high-accuracy placement, making it a crucial asset in modern electronic assembly lines.

Key Features and Capabilities

The FUJI H02F HEAD is designed for versatility, supporting a wide range of components from 1608 (0603") up to 74mm x 74mm[4][5]. With its two nozzles, it enhances throughput while maintaining precision. The H02F HEAD is suitable for a variety of applications, including standard SMT components and larger or odd-shaped parts.

Precision and Accuracy

The FUJI H02F HEAD delivers high placement accuracy, ensuring the proper functioning of electronic circuits[4][5]. The accuracy is achieved through Fuji's refined servo control and vision recognition technology.

Throughput and Speed

Achieving a throughput of 6,700 chips per hour (CPH), the FUJI H02F HEAD maximizes production efficiency. Its high-speed operation ensures that assembly lines can meet the demands of high-volume manufacturing.

Component Handling

The FUJI H02F HEAD is designed to handle a variety of components, from small chips to larger components. Its dual-nozzle design allows for efficient handling and placement of a diverse range of parts.

Accessories and Options

To further enhance the capabilities of the FUJI H02F HEAD, various accessories and options are available:

- * Nozzles: Different nozzle types accommodate various component sizes and shapes.
- * Spare Parts: Availability of spare parts ensures minimal downtime.

Applications

The FUJI H02F HEAD is ideally suited for:

- * High-volume manufacturing: Achieving high throughput in mass production environments.
- * Diverse SMT lines: Adapting to various production needs with its flexible design.
- * Placement of a wide range of components: Efficiently handling components from small chips to larger parts.

Advantages of the FUJI H02F HEAD

- * High Speed: Enables rapid placement of components, maximizing production throughput.
- * Precision: Ensures accurate placement, critical for the reliability of electronic devices.
- * Versatility: Compatible with a wide range of component sizes and shapes.

Frequently Asked Questions

Q1: What is the primary advantage of the FUJI H02F HEAD?

A: The primary advantage of the FUJI H02F HEAD is its combination of high speed and high accuracy, making it ideal for enhanced SMT production.

Q2: What is the placement accuracy of the FUJI H02F HEAD?

A: The FUJI H02F HEAD offers 25um accuracy.

Q3: What types of machines are compatible with the FUJI H02F HEAD?

A: The FUJI H02F HEAD is designed for use with FUJI NXT series placement machines.

Q4: What range of component sizes can the FUJI H02F HEAD handle?

A: The FUJI H02F HEAD can handle components ranging from 1608 to 74mm x 74mm.

Q5: How does the dual-nozzle design of the FUJI H02F HEAD enhance production?

A: The dual-nozzle design allows for the simultaneous handling of two components, increasing throughput and overall production efficiency.
