

Original H24G FUJI Nxt Head 2UGTHA0000134 for SMT Assembly Lines

Our Product Introduction

for more products please visit us on smtmachinepart.com

Basic Information

- Place of Origin: Japan
- Brand Name: fuji
- Model Number: 2UGTHA0000134
- Minimum Order Quantity: 1 PCS
- Price: USD+negotiable+pcs
- Packaging Details: 600*350*360mm
- Delivery Time: 1-7 days
- Payment Terms: T/T
- Supply Ability: 1+pcs+per days

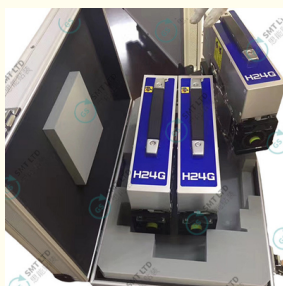

Product Specification

- Brand Name: FUJI
- Product Name: FUJI Nxt H24G Head
- Model Number: 2UGTHA0000134
- Condition: Original New/Used Original
- Highlight: H24G FUJI Nxt Head,
SMT Assembly Lines FUJI Nxt Head,
2UGTHA0000134

Product Description

- * High Speed and Productivity: Some heads, like the new H24G high-speed head, can achieve up to 37,500 chips per hour, which is a 44% improvement over previous models[1]. The NXT III also features a faster XY robot and tape feeders that increase placement ability for all part sizes and types[1].
 - * Precision and Accuracy: FUJI NXT heads, such as the H24S/H24A, can achieve a placement accuracy of ± 0.025 mm in standard mode and even higher accuracy (± 0.015 mm) in heightened accuracy mode[2]. This level of precision is crucial for handling increasingly smaller components like 0201 mm parts[1].
 - * Versatility and Configurability: The NXT series offers various head types to accommodate different production needs[3]. Heads can be easily removed and installed, adapting machine specifications to changes in production volume and part type[3]. The machine automatically performs calibration after head and unit exchange[3].
 - * Component Handling: The DynaHead (DX) can handle a range of parts, automatically exchanging tools based on the part size, from chips to large and odd-form parts[7].
 - * Maintenance and Support: Features like the Auto Head Cleaner save time and allow staff to focus on other tasks[5]. The ability to quickly remove heads is a key feature of the NXT, enabling the use of spare heads during cleaning to avoid production disruption[5].
- The NXT SMT series is designed to be modular, reconfigurable, and scalable, allowing users to create the best machine configuration for their specific production requirements[3].
