Product Description

Panasonic AC Servo Motor Driver HC-MF23B-S24

The Panasonic KXF0DX1BA00 AC Servo Motor (HC-MF23B-S24) is a high-performance 200W servo motor specifically designed for CM402 tray applications in SMT manufacturing equipment.

Product Overview

This industrial-grade servo motor provides precise motion control for automated manufacturing systems, particularly in surface mount technology (SMT) applications where reliability and accuracy are critical.

Key Features

- 200W AC servo motor with high torque output
- Compatible with Panasonic CM402 tray systems
- Precision encoder for accurate positioning
- Designed for DT401 TL-axis applications
- Industrial-grade construction for demanding environments
- Easy integration with existing automation systems

Technical Specifications

Model Number	KXF0DX1BA00 / HC-MF23B-S24
Motor Type	AC Servo Motor
Power Rating	200W
Application	CM402 Tray Systems
Compatible Equipment	Panasonic CM402, DT401 TL-axis

Applications

This servo motor is ideal for SMT manufacturing equipment, automated assembly lines, and precision motion control systems requiring reliable performance in industrial environments.
