

## High Precision PCB Support PIN 44MM length Compatibility with GXH G5S

Our Product Introduction

for more products please visit us on [smtmachinepart.com](http://smtmachinepart.com)

### Basic Information

- Place of Origin: China
- Brand Name: HITACHI
- Minimum Order Quantity: 1 PCS
- Price: USD+negotiable+pcs
- Packaging Details: 150\*60\*60mm
- Delivery Time: 1-7 days
- Payment Terms: T/T
- Supply Ability: 1+pcs+per days

### Product Specification

- Brand Name: HITACHI
- Size: 127\*45\*44mm
- Condition: New Compatible
- Lead Time: 1-7 Days
- Highlight: High Precision PCB Support Pin, PCB Support Pin 44MM

## Product Description

### 一, Understanding the GXH G5S PCB Support PIN 44MM

The GXH G5S PCB Support PIN is a high-precision component designed to support PCBs during the assembly process. With a length of 44mm, it provides optimal stability and alignment for PCBs, ensuring that they remain flat and securely positioned throughout the SMT process.

This support pin is widely used in pick-and-place machines and reflow soldering systems, playing a critical role in ensuring accurate component placement and minimizing movement or warping of the PCB.

### 二, Key Features of the GXH G5S PCB Support PIN 44MM

#### 1. Durable Construction

- Made from high-quality materials, the support pin is designed to withstand the demanding conditions of electronics manufacturing.
- Its robust design ensures a long lifespan, even with continuous use.

#### 2. Precision Design

- The 44mm length is optimized for various PCB thicknesses, providing uniform support across the board.
- Its precise construction ensures a snug fit and prevents any lateral movement.

#### 3. Easy Installation and Removal

- The pin is designed for quick and straightforward installation, allowing operators to adjust or replace it as needed without causing delays.

#### 4. Compatibility with GXH G5S Machines

- Specifically engineered for GXH G5S systems, ensuring seamless integration and reliable performance.

#### 5. Anti-Slip Surface

- Many support pins feature a textured surface to prevent the PCB from slipping during assembly.
